

# Jumbo Flange & Gasket

Products - Cat 4 - Wax Gaskets, Cold Solders, and Lubricants

## DESCRIPTION

**Black Swan's Jumbo Flange & Gasket** is a 100% pure wax gasket for setting all floor outlet toilet bowls. This ring contains 40% more wax than the regular **Black Swan Flange & Gasket**. Ideal to use where the regular ring does not provide enough wax to make a good seal. The gasket forms a water tight, gas tight and odor tight seal. Fits 3" and 4" waste lines. Meets Federal Specification TT-P-1536A. This ring has a plastic flange which extends the discharge opening. This makes for a more positive seal and assures proper bowl alignment.

## DIRECTIONS

1. Be sure the wax ring is at room temperature (about 70°F). If wax ring is too cold a good seal may not be made or the toilet bowl could crack while making the installation.
2. With the toilet bowl upside down on a protective pad or blanket, place the wax ring around the discharge opening, extending plastic flange away from the bowl. Press firmly to assure adhesion when the toilet is inverted.
3. Using **Black Swan's Stainless or Stay Soft Putty** make a putty ring about 1 inch high around the outside rim of the toilet. This will make a seal between the toilet rim and the floor.
4. Carefully set toilet down on bolts and twist bowl slightly to spread wax and putty to make a tight seal. Tighten bolts carefully to prevent breaking the bowl.
