introducing... Quick-Tite® ${ }^{\text {Pritimgs }}$

Quick-Tite ${ }^{\circledR}$ Fittings by Component Hardware are designed to prevent grease and other liquids from penetrating through the metal wall of a cooking hood or duct wherever a hole is created to accommodate fire suppression systems.

Quick-Tite ${ }^{\circledR}$ Fittings make installations much faster, easier and less costly by providing a stable, weld-tight joint without the hassles or expense of actual on-site welding and polishing.

> Provides structural support for the system piping, improving system integrity and reducing the need for additional pipe hangers.
> - Available in eight standard sizes to accommodate pipe sizes from $1 / 4$ " to $1-1 / 2^{"}$ pipe.
> All Quick-Tite ${ }^{\circledR}$ Fittings are pressure tested to 5000 psi
> Tested and Listed by Underwriters Laboratories under "Hood and Duct Accessories". (compatible with UL listed fire suppression systems)
> 1 In conformance with the requirements of NFPA Standard No. 96 .
> Manufactured of solid machined steel for superior strength and high temperature resistance.
> D Supplied with a chrome plated finish to maximize corrosion resistance and attractive appearance
> Wittings are provided with internal pipe threads to permit easy coupling of the pipes at the point of penetration.

Ultimate Protection Against Grease

## 

- Quick-Tite ${ }^{\circledR}$ Hole Plugs are designed to provide a positive seal or patch for existing penetrations that are no longer required.
- Ideal to repair unwanted holes as a result of changes to a fire protection system, moving the location of a fire suppression nozzle, drilling a hole at the wrong location or using a hood/duct with previously drilled holes.
- Quick-Tite ${ }^{\circledR}$ Hole Plugs are easy to install and provide an attractive, finished appearance to match adapters
- Available for five standard hole sizes - $3 / 4$ ", $7 / 8^{\prime \prime}, 1-1 / 8^{\prime \prime}, 1-3 / 8 "$ ", and 1-5/8".
