

## **MODEL - Z7000-VB VACUUM BREAKER**

## **INSTALLATION INSTRUCTIONS**

- 1. SCREW FEMALE THREADS ONTO ELBOW OR SHOWERARM OF WATER SUPPLY.
- 2. ATTACH HOSE FROM HANDWALL UNIT TO MALE THREAD ON VACUUM BREAKER. ARROW ON VACUUM BREAKER SHOULD POINT IN DIRECTION OF WATER FLOW.

## Z7000-VB PARTS LIST

| Item | Part Number | Description            | Qty. |
|------|-------------|------------------------|------|
| 1    | 92475001    | Washer                 | 1    |
| 2    | 92479001    | Vacuum Breaker Housing | 1    |
| 3    | 92477001    | Bladder Bushing        | 1    |
| 4    | 92478001    | Rubber Bladder         | 1    |
| 5    | 92476001    | Connector Bushing 1    |      |
| 6    | 92480001    | Locking Connector      | 1    |

| Maintenance and Trouble Shooting Guide                 |  |  |  |  |
|--|--|--|--|--|
| Problem  | Cause  | Solution   |  |  |
| Vacuum breaker or<br>shower valve makes<br>loud noise. | Large pressure difference causing piston in valve to move rapidly. | Alter water system such that pressure differential is no more than 5 psi from hot to cold. |  |  |
|  | Handwall unit/ vacuum breaker combination restricting water flow.  | Remove flow control device in handwall unit per local codes.                               |  |  |
| Insufficient water flow                                | Showerhead plugged.  | Clean showerhead.  |  |  |
|  | Low Pressure.  | Increase pressure.   |  |  |
